

To: PROGRAM DIRECTORS, AT40 Stations

From: TOM ROUNDS

April 19, 1974

We're asking your help in compiling the 1974 Edition of the AMERICAN TOP 40 Worldwide Listening Directory. The directory will be made available in quantity to all subscribers in early June, 1974. Stations will be able to pass it out to listeners going out of town this vacation season so they'll be able to keep track of AT40 wherever they go. It's a tremendous cross-promotion... a way for stations to cooperate in getting new arrivals to tune in, not just to AT40 but the entire station schedule.

This year's edition will include a listing of each subscriber by country, state, city, frequency, day and time of each AT40 broadcast and rebroadcast.

Along with program #742-5, next week, we'll be sending out a rough listing and an addressed return envelope. We need your help in correcting your listing and adding any information we don't have, especially time(s) of rebroadcasts, whether the program is simulcast on FM and dial position of your simulcast operation.

Last year we distributed almost 75,000 "Vacation Guides", and we're projecting a circulation of over 100,000 directories this year.

We know you'll want to have accurate info on your station in the directory, so look for the rough, xeroxed 18 page list in next week's program shipment, correct it right away, and return it to us in the next mail.

Thanks!

Special to International subscribers----first of all, apologies to those of you who have been getting late shipments in the past month. Unfortunately, the air freight and transshipping systems had fallen into a slight case of disrepair and it took the news of late program arrivals two weeks to reach us in some cases. As soon as the trouble became known, we spent most of a week in working with the domestic and international departments at Emery air freight here in L. A. We have now inaugurated a new system that calls for Emery to notify us if any individual or group shipment has not reached its primary destination by noon, Wednesday, local time. Because most of the trouble has developed in Australia and the Far East, this means we'll know if a shipment has become lost or mis-delivered by Tuesday our time... and this schedule should give us enough warning to correct the problem. I hope this spells the end to the problem, but all systems have ways of getting screwed up, so please folks, cable us or your local distributors if your program shipments are even one day late. (Special award for diligence to Nick Demuth and the staff at Hong Kong Comm'l, even though your calls arrived at my house at 3AM. Seriously, thanks for playing along with us, Nick.)
